INSTRUCTIONS

Inside the Bowl:

1. Use a fan brush to apply two generous coats of Snowflake to the inside of the bowl.
2. Let the bowl drive for a few minutes before moving on to the next step.
3. We are going to add flowers all over the inside of the bowl, alternating between Red Hot, Blue Lagoon, Pretty in Pink, and Sky Blue. Round brushes with a good point on them make these easier; you'll need a small and a medium round brush.
4. To make a flower, start by placing the tip of your round brush where you want the center of the flower to be.
5. Gently press the brush down and lift it back up to create a teardrop-shaped petal. The harder you press, the larger the petal will be. We want them all to be slightly different in size, even when using the same-sized brush.

- Always start near the center of the flower; repeat these steps 4 more times, arranging them in a circle to make a 5-petal flower.
- The petals can overlap slightly—that helps give the flower a natural look.

6. Continue making flowers, alternating colors and sizes, until you've filled the inside of the bowl. You can even make flowers that extend beyond the rim.
7. After you've finished the first coat of flowers, apply a second coat to each flower using the same technique.
8. Paint the rim section (the top half of the bowl that sticks out) with 2 coats of Snowflake paint using a fan brush.

INSTRUCTIONS

Flower Details:

1. Next, we are going to add some quick details to the flowers on the rim. First, thin down some Snowflake paint by mixing in a small amount of water.
2. Load up a liner brush with the thinned-down snowflake paint.
3. Start at the center of the flower and drag the brush outward to create lines on the petals. On the larger flowers, we did a couple of lines on each petal, and on the small flowers. We only did one.
4. For the centers of the flowers, we are going to tap on a couple of dots of paint.
5. For the red and light blue flowers, we will use Blue Lagoon paint.
6. For the dark blue and pink flowers, we will use Red Hot paint.
7. Dip the handle of the liner brush into paint, then tap it in the center of the flower a few times to create a funky center.

Red Stripes:

1. Next, we are going to use a liner brush to create stripes around the top rim of the bowl.
2. Load your liner brush with a generous amount of Red Hot paint. The first stripe we will apply is around the rim's center.
   Remember that everything about this bowl is hand-painted and imperfect; make those stripes a little wiggly.
3. Then paint a stripe above and below the first one.

- We made the stripes about 3/8" wide and left about 3/8" between them...but you can make them as thick or as thin as you'd like.

4. Repeat for a second layer on each stripe.

INSTRUCTIONS

Bottom Section:

1. Paint the bottom section of the bowl's exterior with 2-3 coats of Blue Lagoon.
2. Allow the bowl to dry for a few minutes before moving on to the next step.
3. For the “stars” on the blue section, we are going to do white flowers instead. Use a water-based marker to mark where you’d like your flowers to go (just a dot).
4. Next, we are going to add flowers to the blue section of the flag using Snowflake and a small round brush.

- Round brushes with a good point on them make these easier.

5. To make a flower, start by placing the tip of your round brush where you want the center of the flower to be.
6. Gently press the brush down and lift it back up to create a teardrop-shaped petal. The harder you press, the larger the petal will be.

- Always start near the center of the flower; repeat these steps 4 more times, arranging them in a circle to make a 5-petal flower.
- The petals can overlap slightly—that helps give the flower a natural look.
- Apply a second coat to each flower using the same technique.

7. When the flowers are dry, dip the handle of your liner brush into Red Hot paint, then tap a dot onto the center of each flower.

TIPS

- This piece is supposed to be fun and whimsical; don't get stressed out trying to make things perfect!
- Practice a few flowers on your placemat before you move on to your piece if you prefer.
- Sometimes you need to add a sixth petal to fill out the flower shape; that’s okay! We promise, no one is coming around to count!
- Turn your piece as you work instead of your hand to make it easier to place the petals.
